

Nate Cirino

832-833-5202 | cirino.na@northeastern.edu | [portfolio](#) | linkedin.com/in/nate-cirino | github.com/nateci

Available Jan 2027

EDUCATION

Northeastern University

Graduating Aug 2027 | MGPA: 3.6/4.0

B.S. in Computer Science, Systems Concentration

Boston, MA

Coursework: Computer Systems, Computer Architecture, Computer Networks, Algorithms & Data Structures, Object-Oriented Design, Foundations of Software Engineering, Data Science, Systems Security, Cybersecurity

Honors: Dean's List (all semesters), Tech Lead at Northeastern Electronic Racing, PawHacks, json-io OSS Contributor

EXPERIENCE

Wayfair

Jul 2026 – Dec 2026

Software Engineering Co-op

Boston, MA

- Building a REST API unifying 3 e-label suppliers (Vusion, Pricer, Solum) behind one interface, automating price updates across 50,000+ shelf labels and streamlining new outlet launches
- Debug system-level issues across 500+ POS and e-label devices at 99.9% uptime, sub-3-minute mean resolution, spanning all four retail brands (AllModern, Birch Lane, Joss & Main, Perigold)

Wolters Kluwer

Jul 2025 – Jun 2026

Software Engineer

Boston, MA

- Held 92% uptime on the Expert AI real-time inference pipeline serving 250K+ daily active clinicians
- Overhauled JSON serialization across 20+ microservices with json-io, cutting payload size 35% and inter-service latency 28% under peak clinical query load
- Implemented OIDC/IdP auth via Azure for 20 enterprise health systems and 10K+ clinicians, with zero degradation during peak EHR sync windows

SculptAI

Jan 2025 – Aug 2026

Software Architect

New York, NY

- Implemented a FAISS in-memory vector store with periodic re-indexing and AWS S3 Vectors persistence, holding retrieval p95 under 150ms at peak and cutting storage cost ~70% vs. OpenSearch Serverless
- Built Sentinel, a production AI SRE agent, cutting P0/P1 MTTR 45→12 min and MTTD 60% by correlating Prometheus, Tempo, and Loki telemetry via tool-use
- Re-orged 20+ engineers into product-aligned squads (Retrieval, Generation, Observability); now technical advisor

Chevron New Energies

May 2024 – Aug 2024

Software Engineer Intern

Houston, TX

- Automated 200+ Azure Data Factory pipelines across 10+ data sources at 99.95% success, holding retry latency overhead under 1% via exponential-backoff policies
- Cut change failure rate 15%→2% with multi-stage Azure DevOps CI running unit, integration, and performance tests in staging to catch regressions pre-production

PROJECTS

Kepler | Rust, C++, Raft, LSM-tree, MVCC, Tokio

Mar. 2026 – Present

- Built a distributed, linearizable key-value store in Rust with from-scratch Raft consensus and an LSM-tree engine
- Cut API server latency 25% and held 99% uptime across 100 containerized pods under write-heavy load; dropped managed-etcd via an MVCC layer, saving \$2,500/month and raising TPS headroom 30%

NOAA AUV Sonar Detection | Python, PyTorch, AWS Neuron SDK, SageMaker

Apr. 2025 – Jul. 2025

- Tuned CNN inference to sub-50ms p99 latency on a single AWS Inferentia2 accelerator core for real-time onboard AUVs
- Trained PyTorch CNNs on thermal sensor spectrograms to detect novel aquatic signatures at 94.7% precision and 91.2% recall over 10,000+ test events, cutting false positives 75% vs. prior baselines

SKILLS & INTERESTS

Languages & Tools: C, C++, Python, Java, Go, Rust, JavaScript, TypeScript, Kotlin, Swift, Bash, Linux, Docker, Kubernetes, gRPC, SQL, PostgreSQL, MySQL, MongoDB, GraphQL, Terraform, Buildkite, AWS, Azure, GCP

Frameworks & Libraries: PyTorch, TensorFlow, Node.js, React, Next.js, Express, Flask, FastAPI, Spring Boot

AI / Agentic Tooling: Devin, Cursor, Claude Code, Claude Cowork, GitHub Copilot, CodeRabbit

Interests: Avid Cleveland Browns fan, Weightlifting, Rock Climbing, BJJ, Running
