Available May 2027

EDUCATION

Northeastern University

May 2027 | MGPA: 3.6/4.0

B.S. in Computer Science, Systems Concentration

Boston, MA

Coursework: Object-Oriented Design, Foundations of Software Engineering, Algorithms & Data Structures, Computer Systems, Computer Networks, Systems Security, Cybersecurity, Foundations of Data Science, Digital Design & Computer Architecture

EXPERIENCE

Wayfair

Jul 2026 – Present

Software Engineering Co-op

Boston, MA

- Designing a supplier-agnostic e-label integration API unifying 4 external vendor systems behind one interface, driving business outcomes by powering new retail outlet launches
- Own front-of-house device stack across all Wayfair retail brands (AllModern, Birch Lane, Joss & Main, Perigold): e-label, mobile, and customer/associate-facing POS applications
- Delivered POS checkout features on an Agile team: in-store scan-to-basket customer switching and live associate-entry customer sync, from requirements through testing and support

Wolters Kluwer

Jul 2025 – Jun 2026

Software Engineer

Boston, MA

- Built Java Spring microservice for CME credit issuance inside Expert AI's clinician-facing workflow, coded and tested against enterprise accrual/redemption business requirements
- Integrated Expert AI into CME accrual/redemption microservices, expanding GenAI clinical decision support to 250K+ clinicians
- Implemented OIDC/IdP application security via Azure across 20 enterprise health systems, securing 10K+ clinicians in a regulated environment
- Overhauled Relay JMS broker serialization with json-io across 20+ microservices, eliminating timeouts at scale
- Optimized Expert AI search and filtering across 20+ microservices, improving clinical query relevance at scale

SculptAI

Jan 2025 – Aug 2026

Software Architect

New York, NY

- Architected Flask backend and systems architecture with a RAG pipeline for personalized workout recommendations using Bedrock KB
- Maintained 99.99% uptime across 1-2M monthly model calls for 2K paying users via AWS WAF, Datadog, and Kubernetes application infrastructure
- Evolved cloud stack from LangChain to Vespa to zero-ops Bedrock KB, improving retrieval quality and reducing operational overhead
- Led eng org restructure at \$1M-funded startup, partitioning teams into DevOps, dev, and agentic workflows
- Continue as technical advisor on architecture and agentic-workflow direction

Chevron New Energies

May 2024 – Aug 2024

Software Engineer Intern

Houston, TX

- Built RESTful API integrations and data pipelines using Azure Data Factory, improving product efficiency by 40%
- Implemented CI/CD workflows using Azure DevOps and Kubernetes, enabling automated software implementation and rollback

PROJECTS

Sentinel | *Next.js, FastAPI, Claude, pgvector, OpenTelemetry, Docker*

Apr. 2026 – Present

- Built an AI SRE agent autonomously triaging incidents via tool-use over Prometheus, Tempo, and Loki telemetry
- Built pgvector RAG over runbooks and postmortems with prompt caching on frozen schemas; 100% eval accuracy
- Human-in-the-loop remediation gated behind approval; running live in SculptAI production triaging incidents

Kepler | *Rust, C++, Raft, LSM-tree, MVCC, Tokio*

Mar. 2026 – Present

- Built a distributed, linearizable key-value store in Rust with from-scratch Raft consensus and LSM-tree engine
- Implemented Raft election, log replication, and membership changes; storage: memtable, WAL, leveled SSTables
- Added MVCC transaction layer providing snapshot isolation and linearizable reads across multi-node Raft cluster
- Built single-tier compaction with full SSTable rewrite every 4 flushes; inline, writer-blocking execution

NOAA AUV Sonar Detection | *Python, PyTorch, AWS Neuron SDK, SageMaker*

April 2025 – July 2025

- Trained CNN models on thermal sensor spectrograms to detect novel aquatic signatures for NOAA AUVs
- Refined architecture and loss formulation to address class imbalance and sensor noise, improving model detection
- Designed AWS Neuron SDK deployment path for onboard custom-silicon inference under hard real-time limits

SKILLS & HONORS

Languages/Tools: Java, Python, TypeScript, JavaScript, C, C++, Rust, Bash, Groovy, Azure, AWS, Linux, Docker, Kubernetes, Terraform, Jenkins, Buildkite, PostgreSQL, GraphQL

Frameworks & Libraries: Spring, Flask, FastAPI, Node.js, Express, React, Next.js, PyTorch, TensorFlow, Pandas

AI / Agentic Tooling: Devin, Cursor, Claude Code, Claude Cowork, GitHub Copilot, CodeRabbit

Honors: Dean's List (All Semesters), Tech Lead at Northeastern Electronic Racing, PawHacks, json-io OSS Contributor
