

Nate Cirino

832-833-5202 | cirino.na@northeastern.edu | [portfolio](#) | linkedin.com/in/nate-cirino | github.com/nateci

Available May 2027

EDUCATION

Northeastern University

May 2027 | MGPA: 3.6/4.0

B.S. in Computer Science, Systems Concentration

Boston, MA

Coursework: Algorithms & Data Structures, Object-Oriented Design, Foundations of Software Engineering, Computer Systems, Computer Networks, Computer Architecture, Data Science, Systems Security, Cybersecurity

Honors: Dean's List (all semesters), Tech Lead at Northeastern Electronic Racing, PawHacks, json-io OSS Contributor

EXPERIENCE

Wayfair

Jul 2026 – Present

Software Engineering Co-op

Boston, MA

- Building a REST API that unifies 3 competing e-label suppliers (Vusion, Pricer, Solum) behind one interface, working directly with retail stakeholders to drive dynamic price updates across 50,000+ shelf labels
- Manage 500+ front-of-house POS and e-label devices at 99.9% uptime with sub-3-minute average resolution across all four Wayfair retail brands (AllModern, Birch Lane, Joss & Main, Perigold)

SculptAI

Jan 2025 – Aug 2026

Software Architect

New York, NY

- Built Sentinel, a production AI SRE agent on foundation models that correlates Prometheus, Tempo, and Loki telemetry via tool-use, cutting MTTR on P0/P1 incidents from 45 to 12 minutes and reducing MTTD 60%
- Made retrieval reliable in production with a FAISS in-memory vector store, periodic re-indexing, and AWS S3 Vectors for persistence, holding p95 under 150ms at peak and cutting vector storage cost roughly 70% vs. OpenSearch Serverless
- Re-orged 20+ engineers into product-aligned squads (Retrieval, Generation, Observability); now technical advisor

Wolters Kluwer

Jul 2025 – Jun 2026

Software Engineer

Boston, MA

- Held 92% uptime for the Expert AI inference pipeline serving 250K+ daily active clinicians in production
- Overhauled JSON serialization across 20+ microservices with json-io, reducing average payload size 35% and cutting inter-service communication latency 28% during high-traffic clinical query periods
- Implemented OIDC/IdP authentication via Azure across 20 enterprise health systems, securing access for 10K+ clinicians with zero degradation during peak EHR synchronization windows

Chevron New Energies

May 2024 – Aug 2024

Software Engineer Intern

Houston, TX

- Orchestrated 200+ Azure Data Factory pipelines across 10+ data sources at a 99.95% success rate, holding retry-induced latency overhead under 1% via exponential-backoff retry policies
- Cut change failure rate from 15% to 2% with multi-stage Azure DevOps CI/CD pipelines running automated unit, integration, and performance tests in staging to catch regressions before production

PROJECTS

NOAA AUV Sonar Detection | *Python, PyTorch, AWS Neuron SDK, SageMaker*

Apr. 2025 – Jul. 2025

- Trained and evaluated CNN models on thermal sensor spectrograms to detect novel aquatic signatures, reaching 94.7% precision and 91.2% recall on a 10,000+ event test set while cutting false positives 75% over prior baselines
- Optimized CNN inference to sub-50ms p99 latency on a single AWS Inferentia2 core for real-time onboard AUVs

Kepler | *Rust, C++, Raft, LSM-tree, MVCC, Tokio*

Mar. 2026 – Present

- Built a distributed, linearizable key-value store in Rust with from-scratch Raft consensus and an LSM-tree engine
- Reduced API server latency 25% and held 99% uptime across 100 Kubernetes pods under write-heavy load; eliminated managed-etcd dependence via an MVCC layer, cutting infra cost \$2,500/month and raising TPS headroom 30%

SKILLS & INTERESTS

Languages & Tools: Python, TypeScript, JavaScript, Go, Rust, Java, C, C++, Kotlin, Swift, Bash, SQL, PostgreSQL, MongoDB, MySQL, GraphQL, AWS, Kubernetes, Terraform, Docker, Azure, GCP, Buildkite, Linux, gRPC

Frameworks & Libraries: React, Next.js, Node.js, FastAPI, Flask, Express, PyTorch, TensorFlow, Spring Boot

AI / Agentic Tooling: Claude Code, Claude Cowork, Cursor, Devin, GitHub Copilot, CodeRabbit

Interests: Avid Cleveland Browns fan, Weightlifting, Rock Climbing, BJJ, Running
