Available May 2027

EDUCATION

Northeastern University

May 2027 | MGPA: 3.6/4.0

B.S. in Computer Science, Systems Concentration

Boston, MA

Coursework: Object-Oriented Design, Foundations of Software Engineering, Algorithms & Data Structures, Computer Systems, Computer Networks, Systems Security, Cybersecurity, Foundations of Data Science, Digital Design & Computer Architecture

EXPERIENCE

Wayfair

Jul 2026 – Present

Software Engineering Co-op

Boston, MA

- Designing a supplier-agnostic e-label REST API unifying 4 vendor integrations behind one service interface
- Shipped customer-facing POS transaction flows: in-store scan-to-basket customer switching and live associate-entry sync
- Own front-of-house device stack across all Wayfair retail brands (AllModern, Birch Lane, Joss & Main, Perigold), gathering high-level requirements from retail stakeholders and breaking them into development tasks

Wolters Kluwer

Jul 2025 – Jun 2026

Software Engineer

Boston, MA

- Built Java Spring microservice for CME credit issuance inside a clinician-facing web workflow, applying MVC/DAO design patterns and integrating with backend relational databases
- Overhauled Relay JMS broker serialization with json-io across 20+ Java services, eliminating timeouts at scale
- Optimized enterprise search and filtering across 20+ services, improving clinical query relevance at scale
- Implemented OIDC/IdP authentication via Azure across 20 enterprise health systems, securing 10K+ clinicians
- Delivered in a Scrum SDLC with peer code review, version control, and staged release across shared services

SculptAI

Jan 2025 – Aug 2026

Software Architect

New York, NY

- Architected Flask web backend and RAG pipeline for personalized workout recommendations using Bedrock KB
- Deployed and supported services on Linux containers via Kubernetes, sustaining 99.99% uptime across 1–2M monthly model calls for 2K paying users with AWS WAF and Datadog log/metric analysis
- Led eng org restructure at \$1M-funded startup, partitioning teams into DevOps, dev, and agentic workflows
- Continue as technical advisor on architecture and development-process direction

Chevron New Energies

May 2024 – Aug 2024

Software Engineer Intern

Houston, TX

- Built RESTful APIs and database-backed data pipelines using Azure Data Factory, improving product efficiency by 40%
- Implemented CI/CD workflows using Azure DevOps and K8s, enabling automated deployment and rollback

PROJECTS

Sentinel | *Next.js, FastAPI, Claude, pgvector, OpenTelemetry, Docker*

Apr. 2026 – Present

- Built an agent that parses and correlates production log files and telemetry (Prometheus, Tempo, Loki) to triage incidents
- Built pgvector retrieval over runbooks and postmortems with prompt caching on frozen schemas; 100% eval accuracy
- Human-in-the-loop remediation gated behind approval; running live in SculptAI production triaging incidents

Kepler | *Rust, C++, Raft, LSM-tree, MVCC, Tokio*

Mar. 2026 – Present

- Built a distributed, linearizable key-value store in Rust with from-scratch Raft consensus and LSM-tree engine
- Implemented Raft election, log replication, and membership changes; storage: memtable, WAL, leveled SSTables
- Added MVCC transaction layer providing snapshot isolation and linearizable reads across multi-node Raft cluster
- Estimated and sequenced work by complexity and technical debt to keep a multi-subsystem build shippable

NOAA AUV Sonar Detection | *Python, PyTorch, AWS Neuron SDK, SageMaker*

April 2025 – July 2025

- Trained CNN models on thermal sensor spectrograms to detect novel aquatic signatures for NOAA AUVs
- Designed AWS Neuron SDK deployment path for onboard custom-silicon inference under hard real-time limits

SKILLS & HONORS

Languages/Tools: Java, JavaScript, TypeScript, SQL/PostgreSQL, Python, Bash, C, C++, Rust, Linux/Unix, Git, Docker, Kubernetes, Jenkins, Buildkite, Terraform, AWS, Azure, GraphQL, IntelliJ IDEA, VS Code

Frameworks & Libraries: Java Spring, JMS, REST services, Node.js, Express, React, Next.js, Flask, FastAPI, PyTorch, TensorFlow, Pandas

AI / Agentic Tooling: Devin, Cursor, Claude Code, Claude Cowork, GitHub Copilot, CodeRabbit

Honors: Dean's List (All Semesters), json-io (Java OSS) Contributor, Tech Lead at Northeastern Electronic Racing, PawHacks
