EDUCATION

Northeastern University

B.S. in Computer Science, Systems Concentration

May 2027 | MGPA: 3.6/4.0

Boston, MA

Coursework: Computer Networks, Computer Systems, Systems Security, Cybersecurity, Algorithms & Data Structures, Digital Design & Computer Architecture, Object-Oriented Design, Foundations of Software Engineering, Foundations of Data Science

EXPERIENCE

Wayfair

Software Engineering Co-op

Jul 2026 – Present

Boston, MA

- Building a supplier-agnostic e-label API that unifies 4 vendor integrations behind one provisioning interface, letting a single request configure devices across every backend and powering new outlet launches
- Own front-of-house device stack across all Wayfair physical retail brands (AllModern, Birch Lane, Joss & Main, Perigold): e-labels, mobile, and customer/associate-facing POS
- Shipped POS checkout flows: in-store scan-to-basket customer switching and live associate-entry customer sync

Wolters Kluwer

Software Engineer

Jul 2025 – Jun 2026

Boston, MA

- Chased production timeouts to root cause and overhauled Relay JMS broker serialization with json-io across 20+ microservices, eliminating the failures at scale
- Implemented OIDC/IdP authentication via Azure across 20 enterprise health systems, applying consistent access policy for 10K+ clinicians
- Built Java Spring microservice for CME credit issuance inside Expert AI's clinician-facing workflow
- Integrated Expert AI into CME accrual/redemption microservices, expanding GenAI CDS to 250K+ clinicians

SculptAI

Software Architect

Jan 2025 – Aug 2026

New York, NY

- Maintained 99.99% uptime across 1-2M monthly model calls for 2K paying users via AWS WAF, Datadog, and Kubernetes; on call for production incidents and drove each to root cause
- Led eng org restructure at \$1M-funded startup, partitioning teams into DevOps, dev, and agentic workflows
- Architected Flask backend with RAG pipeline for personalized workout recommendations using Bedrock KB
- Evolved RAG stack from LangChain to Vespa to zero-ops Bedrock KB, improving retrieval and reducing overhead

Chevron New Energies

Software Engineer Intern

May 2024 – Aug 2024

Houston, TX

- Automated infrastructure delivery with Azure DevOps CI/CD and Kubernetes, enabling hands-off deployment and safe rollback of running services
- Built RESTful APIs and data pipelines using Azure Data Factory, improving product efficiency by 40%

PROJECTS

Sentinel | *Python, FastAPI, Linux, Claude, pgvector, OpenTelemetry, Docker*

Apr. 2026 – Present

- Built an AI SRE agent that autonomously triages production incidents to root cause via tool-use over Prometheus, Tempo, and Loki telemetry
- Built pgvector RAG over runbooks and postmortems with prompt caching on frozen schemas; 100% eval accuracy
- Human-in-the-loop remediation gated behind approval; running live in SculptAI production triaging incidents

Kepler | *Rust, C++, Raft, LSM-tree, MVCC, Tokio*

Mar. 2026 – Present

- Built a distributed, linearizable key-value store in Rust with from-scratch Raft consensus and LSM-tree engine
- Implemented Raft election, log replication, and cluster membership changes so nodes can be added, removed, and rejoined safely; storage: memtable, WAL, leveled SSTables
- Added MVCC transaction layer providing snapshot isolation and linearizable reads across multi-node Raft cluster

NOAA AUV Sonar Detection | *Python, PyTorch, AWS Neuron SDK, SageMaker*

April 2025 – July 2025

- Trained CNN models on thermal sensor spectrograms to detect novel aquatic signatures for NOAA AUVs
- Designed AWS Neuron SDK deployment path for onboard custom-silicon inference under hard real-time limits

SKILLS & HONORS

Languages/Tools: Python, C, C++, Go (learning), Rust, Java, Bash, TypeScript, Linux, AWS, Azure, Kubernetes, Docker, Terraform, Jenkins, Buildkite, PostgreSQL, GraphQL

Infrastructure & Ops: Cloud provisioning (AWS/Azure), CI/CD automation, container orchestration, Datadog observability, production on-call, WAF and network access policy

AI / Agentic Tooling: Claude Code, Claude Cowork, Devin, Cursor, GitHub Copilot, CodeRabbit

Honors: Dean's List (All Semesters), Tech Lead at Northeastern Electronic Racing, PawHacks, json-io OSS Contributor
