Available May 2027

## EDUCATION

### Northeastern University

May 2027 | MGPA: 3.6/4.0

*B.S. in Computer Science, Systems Concentration*

*Boston, MA*

**Coursework:** Object-Oriented Design, Foundations of Software Engineering, Algorithms & Data Structures, Computer Systems, Digital Design & Computer Architecture, Computer Networks, Foundations of Data Science, Systems Security, Cybersecurity

## EXPERIENCE

### Wayfair

Jul 2026 – Present

*Software Engineering Co-op*

*Boston, MA*

- Own front-of-house device stack across all Wayfair retail brands (AllModern, Birch Lane, Joss & Main, Perigold): mobile applications, e-labels, and customer/associate-facing POS interfaces
- Shipped POS checkout flows end to end – requirements, design, code, test, and production release – delivering in-store scan-to-basket customer switching and live associate-entry customer sync
- Building supplier-agnostic e-label API unifying 4 suppliers behind one interface; partner cross-functionally in Agile sprints with retail ops to diagnose device-integration defects

### Wolters Kluwer

Jul 2025 – Jun 2026

*Software Engineer*

*Boston, MA*

- Built Java Spring microservice for CME credit issuance inside Expert AI's clinician-facing workflow, applying OOP design patterns and testable, documented service architecture
- Overhauled multi-threaded Relay JMS broker serialization with json-io across 20+ microservices, eliminating timeouts at scale; contributed fixes upstream to the json-io open-source project
- Integrated Expert AI into CME accrual/redemption microservices, expanding GenAI CDS to 250K+ clinicians
- Optimized Expert AI search and filtering across 20+ microservices, improving clinical query relevance at scale
- Implemented OIDC/IdP authentication via Azure across 20 enterprise health systems, securing 10K+ clinicians

### SculptAI

Jan 2025 – Aug 2026

*Software Architect*

*New York, NY*

- Led eng org restructure at \$1M-funded startup, partitioning teams into DevOps, dev, and agentic workflows
- Architected Flask backend with RAG pipeline for personalized workout recommendations using Bedrock KB
- Maintained 99.99% uptime across 1-2M monthly model calls for 2K paying users via AWS WAF, Datadog, and K8s
- Continue as technical advisor on architecture and agentic-workflow direction

### Chevron New Energies

May 2024 – Aug 2024

*Software Engineer Intern*

*Houston, TX*

- Implemented CI/CD workflows using Azure DevOps and K8s, enabling automated deployment and rollback
- Built RESTful APIs and data pipelines using Azure Data Factory, improving product efficiency by 40%

## PROJECTS

### Kepler | *Rust, C++, Raft, LSM-tree, MVCC, Tokio*

Mar. 2026 – Present

- Built a distributed, linearizable key-value store in Rust with from-scratch Raft consensus and LSM-tree engine
- Engineered concurrent, multi-threaded async runtime work on Tokio: Raft election, log replication, and membership changes; storage layer spans memtable, WAL, and leveled SSTables
- Added MVCC transaction layer providing snapshot isolation and linearizable reads across multi-node Raft cluster
- Built single-tier compaction with full SSTable rewrite every 4 flushes; inline, writer-blocking execution

### Sentinel | *Next.js, FastAPI, Claude, pgvector, OpenTelemetry, Docker*

Apr. 2026 – Present

- Built an AI SRE agent autonomously triaging incidents via tool-use over Prometheus, Tempo, and Loki telemetry
- Built pgvector RAG over runbooks and postmortems with prompt caching on frozen schemas; 100% eval accuracy
- Human-in-the-loop remediation gated behind approval; running live in SculptAI production triaging incidents

### NOAA AUV Sonar Detection | *Python, PyTorch, AWS Neuron SDK, SageMaker*

April 2025 – July 2025

- Trained CNN models on thermal sensor spectrograms to detect novel aquatic signatures for NOAA AUVs
- Designed AWS Neuron SDK deployment path for onboard, embedded custom-silicon inference under hard real-time limits

## SKILLS & HONORS

---

**Languages/Tools:** Java, C++, C, Python, Rust, TypeScript, JavaScript, Bash, Git/GitHub, Linux, Jenkins, Buildkite, Groovy, Docker, Kubernetes, AWS, Azure, Terraform, PostgreSQL, GraphQL

**Frameworks & Libraries:** Java Spring, Flask, FastAPI, React, Next.js, Node.js, Express, PyTorch, TensorFlow, Pandas

**AI / Agentic Tooling:** Devin, Cursor, Claude Code, Claude Cowork, GitHub Copilot, CodeRabbit

**Honors:** Dean's List (All Semesters), Tech Lead at Northeastern Electronic Racing, PawHacks, json-io OSS Contributor
