Available May 2027

EDUCATION

Northeastern University

May 2027 | MGPA: 3.6/4.0

B.S. in Computer Science, Systems Concentration

Boston, MA

Coursework: Digital Design & Computer Architecture, Computer Systems, Foundations of Data Science, Algorithms & Data Structures, Computer Networks, Systems Security, Object-Oriented Design, Foundations of Software Engineering, Cybersecurity

EXPERIENCE

Wayfair

Jul 2026 – Present

Software Engineering Co-op

Boston, MA

- Own the front-of-house hardware device stack across all Wayfair physical retail brands (AllModern, Birch Lane, Joss & Main, Perigold): e-label displays, mobile devices, and customer/associate-facing POS terminals
- Building a supplier-agnostic e-label API that qualifies and unifies 4 hardware suppliers behind one interface, de-risking device selection and powering new outlet launches on schedule
- Shipped POS checkout flows validated on in-store hardware: scan-to-basket customer switching and live associate-entry sync

SculptAI

Jan 2025 – Aug 2026

Software Architect

New York, NY

- Sustained 99.99% uptime across 1-2M monthly model calls for 2K paying users via AWS WAF, Datadog, and K8s, owning failure monitoring, alerting thresholds, and post-incident corrective action
- Led eng org restructure at \$1M-funded startup, partitioning teams into DevOps, dev, and agentic workflows
- Architected Flask backend with RAG pipeline for personalized workout recommendations using Bedrock KB
- Evolved RAG stack from LangChain to Vespa to zero-ops Bedrock KB, improving retrieval and reducing overhead
- Continue as technical advisor on architecture and agentic-workflow direction

Wolters Kluwer

Jul 2025 – Jun 2026

Software Engineer

Boston, MA

- Overhauled Relay JMS broker serialization with json-io across 20+ microservices, root-causing and eliminating timeout failures under production load
- Integrated Expert AI into CME accrual/redemption microservices, expanding GenAI CDS to 250K+ clinicians
- Built Java Spring microservice for CME credit issuance inside Expert AI's clinician-facing workflow
- Implemented OIDC/IdP authentication via Azure across 20 enterprise health systems, securing 10K+ clinicians

Chevron New Energies

May 2024 – Aug 2024

Software Engineer Intern

Houston, TX

- Built RESTful APIs and data pipelines using Azure Data Factory, improving product efficiency by 40%
- Implemented CI/CD workflows using Azure DevOps and K8s, enabling automated deployment and rollback

PROJECTS

NOAA AUV Sonar Detection | *Python, PyTorch, AWS Neuron SDK, SageMaker*

April 2025 – July 2025

- Trained CNN models on thermal sensor spectrograms to detect novel aquatic signatures for NOAA autonomous underwater vehicles operating in the field
- Characterized noisy sensor measurements statistically and refined architecture and loss formulation to address class imbalance and sensor noise, improving detection rates
- Designed AWS Neuron SDK deployment path for onboard custom-silicon inference under hard real-time limits

Kepler | *Rust, C++, Raft, LSM-tree, MVCC, Tokio*

Mar. 2026 – Present

- Built a fault-tolerant, linearizable distributed key-value store in Rust with from-scratch Raft consensus and an LSM-tree storage engine
- Implemented Raft election, log replication, and membership changes; storage: memtable, WAL crash recovery, leveled SSTables
- Validated correctness under node-failure and partition scenarios; MVCC layer provides snapshot isolation and linearizable reads across the cluster

Sentinel | *Next.js, FastAPI, Claude, pgvector, OpenTelemetry, Docker*

Apr. 2026 – Present

- Built an AI SRE agent that autonomously performs failure triage and root-cause analysis over Prometheus, Tempo, and Loki telemetry
- Built pgvector RAG over runbooks and postmortems with prompt caching on frozen schemas; 100% eval accuracy
- Human-in-the-loop remediation gated behind approval; running live in SculptAI production triaging incidents

SKILLS & HONORS

Languages/Tools: Python, C, C++, Rust, Java, Bash, Linux, PostgreSQL, Docker, Kubernetes, AWS, Azure, Terraform, Jenkins, Buildkite, Groovy, TypeScript, JavaScript, GraphQL

Data & Modeling: PyTorch, TensorFlow, Pandas, NumPy-based signal/spectrogram analysis, Flask, FastAPI, Node.js, Express, React, Next.js

AI / Agentic Tooling: Devin, Cursor, Claude Code, Claude Cowork, GitHub Copilot, CodeRabbit

Honors: Tech Lead at Northeastern Electronic Racing, Dean's List (All Semesters), PawHacks, json-io OSS Contributor
