Available May 2027

EDUCATION

Northeastern University

May 2027 | MGPA: 3.6/4.0

B.S. in Computer Science, Systems Concentration

Boston, MA

Coursework: Computer Systems, Computer Networks, Systems Security, Cybersecurity, Algorithms & Data Structures, Object-Oriented Design, Foundations of Software Engineering, Foundations of Data Science, Digital Design & Computer Architecture

EXPERIENCE

Wayfair

Jul 2026 – Present

Software Engineering Co-op

Boston, MA

- Designing a supplier-agnostic e-label API that unifies 4 external suppliers behind one interface, powering new outlet launches without per-vendor client changes
- Own the front-of-house device stack across all Wayfair retail brands (AllModern, Birch Lane, Joss & Main, Perigold) from design through production operations: e-labels, mobile, and customer/associate-facing POS
- Shipped POS checkout flows: in-store scan-to-basket customer switching and live associate-entry customer sync

Wolters Kluwer

Jul 2025 – Jun 2026

Software Engineer

Boston, MA

- Built and operated backend microservices for a clinical decision-support platform, integrating Expert AI into CME accrual/redemption services and expanding GenAI CDS to 250K+ clinicians
- Implemented OIDC/IdP authentication and access entitlements via Azure across 20 enterprise health systems, governing secure clinical data access for 10K+ clinicians
- Overhauled Relay JMS broker serialization with json-io across 20+ distributed microservices, eliminating timeouts at scale and improving reliability of cross-service messaging
- Built Java Spring microservice and APIs for CME credit issuance inside Expert AI's clinician-facing workflow
- Optimized Expert AI search and filtering across 20+ microservices, improving clinical query relevance and latency over large document sets

SculptAI

Jan 2025 – Aug 2026

Software Architect

New York, NY

- Maintained 99.99% uptime across 1-2M monthly model calls for 2K paying users via AWS WAF, Datadog, and K8s
- Architected Flask backend with RAG data pipeline for personalized workout recommendations using Bedrock KB
- Evolved retrieval stack from LangChain to Vespa to zero-ops Bedrock KB, improving quality while cutting infrastructure cost and operational overhead
- Led eng org restructure at \$1M-funded startup, partitioning teams into DevOps, dev, and agentic workflows
- Continue as technical advisor on architecture and agentic-workflow direction

Chevron New Energies

May 2024 – Aug 2024

Software Engineer Intern

Houston, TX

- Built RESTful APIs and large-scale data pipelines using Azure Data Factory, improving product efficiency by 40%
- Implemented CI/CD workflows using Azure DevOps and K8s, enabling automated deployment and rollback

PROJECTS

Kepler | *Rust, C++, Raft, LSM-tree, MVCC, Tokio*

Mar. 2026 – Present

- Built a distributed, linearizable key-value store in Rust with from-scratch Raft consensus and LSM-tree engine
- Implemented Raft election, log replication, and membership changes to evolve cluster topology without downtime; storage: memtable, WAL, leveled SSTables
- Added MVCC transaction layer providing snapshot isolation and linearizable reads across multi-node Raft cluster
- Built single-tier compaction with full SSTable rewrite every 4 flushes; inline, writer-blocking execution

Sentinel | *Next.js, FastAPI, Claude, pgvector, OpenTelemetry, Docker*

Apr. 2026 – Present

- Built an AI SRE agent autonomously triaging production incidents via tool-use over Prometheus, Tempo, and Loki telemetry
- Built pgvector RAG over runbooks and postmortems with prompt caching on frozen schemas; 100% eval accuracy
- Human-in-the-loop remediation gated behind approval; running live in SculptAI production triaging incidents

NOAA AUV Sonar Detection | *Python, PyTorch, AWS Neuron SDK, SageMaker*

April 2025 – July 2025

- Trained CNN models on thermal sensor spectrograms to detect novel aquatic signatures for NOAA AUVs
- Refined architecture and loss formulation to address class imbalance and sensor noise, improving model detection
- Designed AWS Neuron SDK deployment path for onboard custom-silicon inference under hard real-time limits

SKILLS & HONORS

Languages/Tools: Java, Python, Rust, C, C++, TypeScript, JavaScript, Bash, Linux, Azure, AWS, Kubernetes, Docker, Terraform, PostgreSQL, GraphQL, Jenkins, Buildkite, Groovy

Frameworks & Libraries: Spring, Flask, FastAPI, Node.js, Express, React, Next.js, PyTorch, TensorFlow, Pandas

AI / Agentic Tooling: Devin, Cursor, Claude Code, Claude Cowork, GitHub Copilot, CodeRabbit

Honors: Dean's List (All Semesters), Tech Lead at Northeastern Electronic Racing, PawHacks, json-io OSS Contributor
